

Naktuinbouw Laboratories Price list 2021

Basic fee 2021

A basic fee will be charged per assignment. The basic fee is € 26,- and € 0,36 per sample. For assignments via mijnNaktuinbouw, the basic fee is € 15,60 and the sample fee is € 0,36 per sample.

- * Assignments for plant material: Samples of the same crop are jointly registered in one assignment. The basic fee will be charged once.
- * Assignments for seeds and soil: Each sample is registered as a separate assignment. The basic fee is charged per sample.

General instructions on submitting samples

- * The material must be packaged in plastic and the packaging must be sealed properly. Send the sample in a sturdy box. Secure the submission form in the parcel.
- * Liquid samples must be submitted in vapour-tight packaging.
- * For shipments from outside the European Union we have a sticker available to send samples without a phytosanitary certificate. For inquiries please contact our lab administration. (laboratory@naktuinbouw.com).
- * Submission forms for the different types of orders can be found at our website, they can also be requested at the administration (laboratory@naktuinbouw.com)
- * If you state on your shipment that it is URGENT and has to be given priority, the sample will be prepared and tested as soon as possible. An extra urgency fee will apply.

myNaktuinbouw

Requests for seed analysis, seed health testing and nematode testing, can be submitted electronically through myNaktuinbouw. You enter the data of the sample and select the appropriate tests. Subsequently, the sample can be sent to Naktuinbouw. When results of the tests are ready, they are available at myNaktuinbouw. You will receive the certificates as you're used to. More information can be found on www.naktuinbouw.com or feel free to contact us via: mijn@naktuinbouw.nl.

Additional instructions

Submitting seeds

- * Seed tests have been developed and validated for untreated seeds. Since the reliability of health tests may be affected if seeds have been treated, submitted seed samples should preferably be untreated. This does not apply for tests where it is stated that it can be applied on treated seeds.
- * If seeds have been disinfected, coated or pilled, please inform us accordingly for the sake of the safety of our employees and possible influence on test results.

Submitting plant material

- * Make sure your plantmaterial is at our laboratory before or on the Wednesday prior to the test week as we are closed in the weekends; material received on Friday can't be proceeded.
- * If you have more questions about sampling, please contact our account manager (laboratory@naktuinbouw.com)

Submitting material for diagnostic testing

- * Pack roots and leaves in such a way that leaves cannot be polluted by soil, e.g. by wrapping the roots in a separate plastic bag and sealing it with an elastic band around the stems.
- * Send a whole plant if possible. Leaf symptoms may be caused by root problems.
- * If needed you can send pictures to diagnostiek@naktuinbouw.nl

Submitting material to make it free from viruses

- * Special conditions apply to the submission of material which has to be made free from viruses. You can obtain more information at Naktuinbouw Test Center in Horst (Netherlands); testcenter@naktuinbouw.com or by phone on +31 77 398 59 19.

Contact with Naktuinbouw Laboratories

Contacting Naktuinbouw Laboratories

You can contact the Laboratory Administration directly for any questions and assignments.

Administration	+31 71 332 61 50
Planning	+31 71 332 62 40
e-mail	laboratory@naktuinbouw.com

Shipping address for all samples

Naktuinbouw
attn. Administration Laboratories
P.O. Box 40
2370 AA Roelofarendsveen
The Netherlands

Delivery address for courier services

Naktuinbouw
attn. Administration Laboratories
Sotaweg 22
2371 GD Roelofarendsveen
The Netherlands

For specific diagnostic enquiries please call (071) 332 62 55 or email diagnostiek@naktuinbouw.nl

If you have any specific laboratory questions regarding diseases in fruit crops, arboricultural crops or strawberries, contact Test Center Horst:

e-mail	testcenter@naktuinbouw.com

Terms and conditions of delivery and disclaimer

The General Terms and Conditions of Naktuinbouw apply to all services provided by the Naktuinbouw Laboratories (registered with the Chamber of Commerce and Industry for Rijnland in Leiden, the Netherlands, under no. 41150707). You can find on our website: www.naktuinbouw.com/terms-and-conditions

All amounts stated are excluding VAT. Changes to rates are reserved.

If testing / diagnosis is not carried out by Naktuinbouw but, after having consulted the client, is subcontracted to a third party, the corresponding costs will be charged to the client.

If you state on your package that it concerns an URGENT assignment, an urgency rate will be apply.

Diagnostic samples are always priority; an extra urgency rate will apply.

Additional testing may be required if a possible pathogen is found. Extra costs for confirmation testing will be charged

The results of tests or assessments provided by Naktuinbouw Laboratories only relate to the actual sample tested and not to the lot concerned, unless Naktuinbouw states otherwise.

Diagnostics

Diagnostics brings the practice of horticulture, the diagnosticians and the researchers of Naktuinbouw Laboratories together. Annually about 250 different crops from numerous countries are studied. The wide experience makes Diagnostics a good partner for reliable diagnoses of diseases, pests and cultivation problems. Please note that our Diagnostics team only performs tests on material with symptoms.

Composition of the test fee

Our Diagnostics Team works with a fixed fee. The advantage for the person submitting samples is that the costs of diagnostic testing are known in advance. Assignments are immediately processed. And savings can also be made on the handling and administrative costs, which will help keep the fees down. The fees below are including the urgency fee. Our Diagnostic Laboratory can handle virus tests for limited-scope diagnosis such as TSWV, INSV and PepMV rather quickly and the applicant can have the test result usually within one day. If necessary, found organisms can be further identified with the help of molecular techniques. We have seen that there is demand for having samples tested for certain viruses fast. This often concerns TSWV, INSV, and PepMV. Naktuinbouw has the facilities to enable such limited-scope diagnoses to be carried out rapidly, so that the person submitting the sample will often get the results within one day.

Fees for diagnosis

	Fee
Standard diagnosis, first sample	€ 247,90
Each additional sample	€ 115,30
Limited diagnosis, first sample (usually visual or microscopic assessment)	€ 193,80
Each additional sample	€ 115,30
Testing for up to 5 viruses, first sample	€ 132,60
Each additional sample	€ 61,20
Testing for up to 10 viruses, first sample	€ 157,60
Each additional sample	€ 84,00
PCR testing per sample ⁴	€ 110,20
Fee per hour for additional work (if needed)	€ 144,20
Verification test (if applicable)	€ 38,40

	Basic test	IF/ microscope/ agglutination	Confirmation PCR
<i>Erwinia amylovora</i>	€ 171,40	€ 48,20	€ 64,00
<i>Phytophthora fragariae</i> (visuele diagnose)	€ 153,00		
<i>Xanthomonas arboricola</i> pv. <i>pruni</i>	€ 187,70		€ 108,10
<i>Xanthomonas fragariae</i>	€ 141,80		€ 108,10

- * The fee for any succeeding additional sample only applies to samples of the same assignment and same crop.
- * If an assignment is clearly so extensive that additional costs must be incurred it cannot possibly be done for these fees, we will contact you in advance.
- * Extra costs for additional services provided, such as sampling or transport, will be charged invoiced.

⁴ An extra PCR test is carried out when final identification of a pathogen is needed.

Testing for Nematodes

Nematodes can seriously harm crops. Preventative testing of the soil, seeds and plant material can prevent this. Naktuinbouw offers testing for various plant-parasitic nematodes which may harm your crops. For example, the presence of *Xiphinema* and *Longidorus* species in soil may be demonstrated as part of the Elite certification procedure for strawberries.

Onion sets, or seed, can only be marketed if accompanied by a statement that the onion sets or the seed in question are free from stem nematode (*Ditylenchus dipsaci*). Other crops also require a statement that they are free from nematode when exported to certain destinations. Naktuinbouw can help you with this. If you would like further information, please contact the Laboratories Administration Team.

Test fee

All fees are excluding sampling. The customer has to take care of sampling or you can ask Naktuinbouw to do this for you. You can contact Naktuinbouw Inspections Department to take samples for certification purposes.

Standard tests on soil	Sample size	Fee
<i>Xiphinema</i> spp. / <i>Longidorus</i> spp.	200 ml	€ 25,70
Standard test for one plant parasitic nematode ²	200 ml	€ 44,20
Standard test for all present plant parasitic nematodes ²	200 ml	€ 103,00
Determination <i>Radopholus</i> spp. ³ substrate	200 - 300 ml	€ 126,00
Only <i>Ditylenchus</i>	1500 ml	€ 44,20

Standard tests on plantmaterial / water	Sample size	Fee
Standard test for one plant parasitic nematode ²	min. 25 gram	€ 49,70
Standard test for all plant parasitic nematodes present ²	min. 25 gram	€ 63,00
Determination <i>Ditylenchus</i> spp. in consumption onions ³	60 pce	€ 126,00
Determination <i>Radopholus</i> spp. ³ in root material	10 grams	€ 126,00

Standard tests on seed	Sample size	Fee
<i>Ditylenchus</i> spp. ²	30.000 seeds (max 500g)	€ 31,40
<i>Aphelenchoides</i> spp. ²	30.000 seeds (max 500g)	€ 31,40

Other	Fee
Fee per hour for extra research (if needed)	€ 130,00
Surcharge urgency fee	€ 75,50
Extra fee for incubation (This will take two additional weeks)	€ 25,60
Extra fee for determination on species level ³	€ 21,00

In case sampling is carried out by Naktuinbouw, sampling costs will be charged by the Department of Inspections

² Naktuinbouw Laboratories can determine the genus for the following nematodes.

³ Fees are inclusive priority treatments and basic rate

- *Aphelenchoides* spp.*
- *Ditylenchus* spp.*
- *Helicotylenchus* spp.*
- *Hemicyclus* spp.
- *Longidorus* spp.
- *Meloidogyne* spp.*/**

- *Paratylenchus* spp.*
- *Paratrichodorus* spp.*
- *Pratylenchus* spp.*
- *Radopholus* spp.*
- *Rotylenchus* spp.
- *Trichodorus* spp.*
- *Tylenchorhynchus* spp.
- *Xiphinema* spp.

* Mentioned nematodes can be determined to species with an extra fee.

** Distinction between *Meloidogyne chitwoodi* and *Meloidogyne fallax* is made using a PCR for € 67,-

Virus test methodes

A quick test is available for some about 70 viruses in floricultural and arboricultural crops: the ELISA. This technique can be used routinely and gives quick results. produces results fast. ELISA is a robust technique with reliable results and a relatively low cost price compared to other techniques. Testing with indicator plants or PCR is also possible. These tests are only carried out on leaf material. Tissue culture plants show a reduced sensitivity in the ELISA. The sensitivity of the ELISA test in tissue culture plants is less.

Fees for ELISA tests

Virus

Group 1

	Fee	Sample size
AICV (LSV), AIMV, AltMV, AMV, AnFBV (AFMoV), ArMV, BBWV, BWYV, BYMV, CarMV, CbMV, CERV, CLV, CMV, CNFV, CRSV, CSNV, CVB, CVMV, CymMV ⁵ , FreSV (FOV), FreMV, HdRSV, HVX, INSV, IYSV, KLV, KMV, NeRNV, ORSV ⁵ , OYDV, PEBV, PepMV ⁵ , PetAMV, PFBV, PLCV, PLPV, PMMoV, PnMV, PNRSV, Potyvirus ⁶ , PVX, PVY, PZSV, RMV, ScrMV, SFBV, SLV, SYNV, TAV, TBRV, TBSV, TMGMV, TMV-WU1, TNV1, TNV2, ToMV-DO3, ToRSV, TRSV, TRV, TSV, TSWV, TVCV, YoMV	€ 2,60	1-2 leaves/cuttings per sample. About 4 cm ² of leaf material is required.

Group 2

	Sample size	Test code	Fee
Freesia mosaic virus corms and cormels	1 CORM PER TEST	FREMVEKK	€ 5,50

⁵ A confirmation PCR of € 67,- may follow

⁶ If you provide material for testing on poty virus, please send double the amount of material as this is required to process the specimen.

Other virus tests

Virus ,viroids and phytoplasm tests

Plant material can be tested for the presence of viruses, viroids or phytoplasmas, using the latest new molecular techniques.

Fungal tests

Fungal tests Testing for fungi is are usually done by a plating method, combined with identification by microscope. New DNA techniques are used for sensitive detection of e.g. Fusarium species in begonia.
Fungal tests Testing for fungi can also be done on soil samples, e.g. for Verticillium dahliae and Fusarium oxysporum spp.

Bacterial

Seed and plant material can be tested for the presence of bacterial diseases. Some of the methods used are: plating on semi selective media, pathogenicity tests, immunofluorescence (IF) and PCR.

Viruses, Viroids and Phytoplasma	Sample size	Test code	Basic test	IF/ microscope/ agglutination	Confirmation PCR
PSTVd, TCDVd, TPMVd real-time RT-PCR	Max. 25 leaves	PSTVD	€ 128,60		
CChMVd real-time RT-PCR	Max. 25 leaves	CCHMVDP	€ 71,50		
CSVd real-time RT-PCR	Max. 25 leaves	CSVDP	€ 71,50		
CSVd, CChMVd real-time RT-PCR	Max. 25 leaves	COMBICSVDCCHMVD	€ 71,50		
Pospiviroiden (CEVd, CLVd, CSVd, IrVd1, PCFVd, PoIVd, PSTVd, TASVd, TCDVd, TPMVd) real-time RT-PCR	Max. 25 leaves	POSPIP	€ 128,60		€ 112,50
Pospiviroiden (CEVd, CLVd, CSVd, IrVd1, PCFVd, PoIVd, PSTVd, TASVd, TCDVd, TPMVd) real-time RT-PCR screening	Max. 200 leaves	POSPIQSCR	€ 405,40		€ 112,50
<i>Dahlia mosaic virus</i> species complex (DMV / DCMV)	Max. 25 leaves	DMVQ	€ 71,50		
<i>Plum pox virus</i> (PPV) real-time RT-PCR	stem material	PPVP	€ 112,50		
<i>Plum pox virus</i> (PDV) real-time RT-PCR	Max. 25 leaves	PDVQ	€ 71,50		
<i>Prunus necrotic ringspot virus</i> (PNRSV) / <i>Prune dwarf virus</i> (PDV) real-time RT-PCR	Max. 25 leaves	COMBIPPQ	€ 71,50		
Combi PDV/PNRSV/PPV	Max. 25 leaves	COMBIPPPQ	€ 84,50		
<i>Tobacco rattle virus</i> (TRV) real-time RT-PCR	Max. 25 leaves	TRVQ	€ 71,50		
<i>Cucumber mosaic virus</i> (CMV) real-time RT-PCR	Max. 25 leaves	CMVQ	€ 71,50		
Combi CMV/TRV	Max. 25 leaves	COMBICTQ	€ 84,50		
Combination apple viruses (ApMV ACLSV ASGV ASPV) real-time RT-PCR	Max. 10 stem parts or 25 leaves	COMBI APPEL PCR	€ 94,50		
Combi CymMV, ORSV, OFV real-time RT-PCR	Max. 25 leaves	COMBICOQ	€ 84,50		
<i>Orchid fleck virus</i> (OFV) real-time RT-PCR	Max. 25 leaves	OFVP	€ 71,50		
CymMV, ORSV real-time RT-PCR	Max. 25 leaves	COMBICOQ	€ 71,50		
<i>Bacopa chlorosis virus</i> (BaCV) real-time RT-PCR	Max. 25 leaves	BACVQ	€ 71,50		
<i>Verbena latent virus</i> (VeLV) real-time RT-PCR	Max. 25 leaves	VELVQ	€ 71,50		
Phytoplasma, for material without symptoms	Max. 5 stem parts, root parts or leaf vein	FYTOQ000	€ 113,60		€ 114,00
Fungi	Sample size	Test code	Basic test	IF/ microscope/ agglutination	Confirmation PCR
<i>Fusarium oxysporum</i>	Max. 6 stem parts	FOA000	€ 31,20	€ 101,30	
Test for <i>Verticillium dahliae</i> in soil samples	2 - 2.5 litres	VDAHLA000	€ 125,30		
<i>Fusarium foetens</i> , for material without symptoms	Max. 5 stem parts	FFA000	€ 84,00	€ 67,00	€ 67,00
<i>Phytophthora ramorum</i>	Max. 20 leaves	PRQ000	€ 34,90		
Combination <i>Phytophthora ramorum</i> and <i>P. kernoviae</i>	Max. 20 leaves	COMBIPRKQ000	€ 54,50		
<i>Colletotrichum</i> spp blottermethode	200 seeds	CSF002	€ 132,30		
<i>Phytophthora rubi</i>	Max. 150 gram roots	PRUQ000	€ 126,00		
<i>Phytophthora fragariae</i>	Max. 150 gram roots	PFQ000	€ 126,00		

Bacteria	Sample size	Test code	Basic test	IF/ microscope/ agglutination	Confirmation PCR
<i>Agrobacterium tumefaciens</i>	0,5 liter water	ATUMP	€ 147,70		€ 67,00
<i>Agrobacterium tumefaciens</i>	Max. 5 stem parts	ATUMQ	€ 45,80		
<i>Rhodococcus facians</i>	Max. 10 stem parts	RFASQ	€ 45,80		
Combination <i>A. tumefaciens</i> and <i>R. facians</i>	Max. 5 stem parts	COMBIAFQ	€ 62,50		
<i>Erwinia chrysanthemi</i>	Max. 5 stem parts	ERCHRI	€ 32,90		€ 112,50
<i>Erwinia amylovora (latent)</i>	100 twigs	ERAMYS000	€ 114,70	€ 51,50	€ 67,00
<i>Xanthomonas axonopodis</i> pv. dieffenbachiae <i>Anthurium</i>	Max. 5 leaves+leaf stems	XADIEI	€ 24,50		€ 112,50
<i>Xanthomonas campestris</i> pv. <i>lobeliae</i>	Max. 5 stem parts	XCLOBI	€ 24,50	€ 54,00	
<i>Xanthomonas hortorum</i> pv. <i>pelargonii</i>	Max. 5 stem parts	XHPELI	€ 24,50		€ 112,50
<i>Xanthomonas axonopodis</i> pv. <i>begoniae</i>	Max. 2 leaves	XABEGQ	€ 45,80		
<i>Xanthomonas axonopodis</i> pv. <i>begoniae</i>	Max. 20 leaves	XABEGQ000	€ 68,50		
<i>Xylella fastidiosa</i>	100 to 200 leaves or twigs	XYLEFAQ000	€ 166,90		
<i>Ralstonia solanacearum</i> culture method ⁷	Max. 5 stem parts	RSOLA	€ 38,40		€ 67,00
	water 1 liter	RSOLA	€ 38,40		€ 67,00
<i>Ralstonia solanacearum</i>	Max. 200 stem parts	RSOLA	€ 38,40		€ 67,00
Other			Fee		
Fee per hour for extra research (if needed)			€ 130,00		
Urgency fee			€ 75,50		
Samples tested by Netherlands Food and Consumer Product Safety Authority			€ 206,00		

⁷ As follow-up of the bio-PCR an extra PCR can be performed à € 67,-

Testing for bacteria and phytoplasms

Seed and plant material can be tested for the presence of bacterial diseases and phytoplasms. Methods that are used are e.g., plating, pathogenicity tests, immunofluorescence (IF) and PCR.

Testing for fungi

Testing for fungi is usually done by a plating method, combined with identification by microscope. New DNA techniques are used for sensitive detection of e.g. Fusarium species. Testing for fungi can also be done on soil samples, e.g. for *Verticillium dahliae* and *Fusarium oxysporum* f.sp. *asparagi*.

Virus tests and viroids

Plant material and/or seed can be tested for the presence of viruses or viroids, using molecular techniques or ELISA.

Test fees

If confirmation tests have to be carried out, they are added to the fees of the basic test. Where combination testing is applicable, you can find the relevant fees with the individual tests.

Tests Crop / Pathogen	Sample size	Test code	Basic test	IF / Microsc.	PCR	Bio test
Asparagus						
<i>Pathogene Fusarium spp. for asparagus</i>	300 seeds	FOAA003	€ 124,30	€ 116,40		€ 116,40
On soil samples	2.5 - 5 liter soil	FOAB000	€ 128,40			
Asparagus virus 1 (AV1)	10 x 10 leaves	AV1E000	€ 93,50			
Aubergine						
Pepino mosaic virus (PepMV)	3,000 seeds	PEPMVE030	€ 124,00		€ 67,00	
	4,750 seeds	PEPMVE048	€ 180,00		€ 67,00	
Pospiviroids (CEVd, CLVd, MPVd, PCFVd, PSTVd, TASVd, TCDVd and TPMVd)	3,000 seeds	COMBIPOSPIQ030PA	€ 178,60			
	4,800 seeds (12 x 400)	COMBIPOSPIQ048PA	€ 600,00			
	20,000 seeds (50 x 400)	COMBIPOSPIQ200PA	€ 2.500,00			
Tomato mottle mosaic virus (ToMMV)	20,000 seeds (50 x 400)	TOMMVQ200PA	€ 2.390,00			
Vertillium dahliae	200 seeds	VDA002	€ 124,00			
Basil						
<i>Fusarium oxysporum</i>	200 seeds	FOA002BA	€ 94,50	€ 100,20

Tests for the purpose of export requirements third countries

For seed material to be exported to third countries, the country of destination sometimes sets additional requirements. In order to facilitate export of your material Naktuinbouw has a number of tests available specifically for this purpose.

Gewas	Pathogen	Sample size	Test code	Basic test
Aubergine	Tomato black ring virus (TBRV)	3,000 seeds	9-TBRVE030	€ 146,00
	Tomato ringspot virus	3,000 seeds	TORSVE030	€ 146,00
Beetroot	Arabis mosaic virus	3,000 seeds	ARMVE030	€ 146,00
	Heterodera schachtii	100 gram seeds	Tested at NPPO	€ 206,00
	Tomato black ring virus (TBRV)	3,000 seeds	9-TBRVE030	€ 146,00
Carrot	Fusarium oxysporum	200 seeds	9-FOA002	€ 135,00
	Phoma sp.	200 seeds	9-PSF002	€ 135,00
Celery	Strawberry latent ringspot virus (SLRSV)	3,000 seeds	SLRSVE030	€ 146,00
Cucurbitaceae	Tomato ringspot virus (ToRSV)	2,000 seeds	TORSVE020	€ 179,00
	Alternaria cucumerina	200 seeds	9-ACA002	€ 135,00
	Tobacco ringspot virus (TRSV)	2,000 seeds	TRSVE020	€ 179,00
Lettuce	Arabis mosaic virus (ArMV)	3,000 seeds	ARMVE030	€ 146,00
	Tomato ringspot virus (ToRSV)	3,000 seeds	TORSVE030	€ 146,00
	Tobacco ringspot virus (TRSV)	3,000 seeds	TRSVE030	€ 146,00
	Verticillium sp.	200 seeds	9-VSF002	€ 135,00
Onion	Onion yellow dwarf virus (OYDV)	3,000 seeds	OYDVE030	€ 146,00
	Tobacco rattle virus (TRV)	3,000 seeds	TRVE030	€ 146,00
	Tobacco streak virus (TSV)	3,000 seeds	TSVE030	€ 146,00
	Tomato black ring virus (TBRV)	3,000 seeds	9-TBRVE030	€ 146,00
Pepper	Arabis mosaic virus (ArMV)	3,000 seeds	ARMVE030	€ 146,00
	Tobacco rattle virus (TRV)	3,000 seeds	TRVE030	€ 146,00
	Tobacco ringspot virus (TRSV)	3,000 seeds	TRSVE030	€ 146,00
	Tomato ringspot virus (ToRSV)	3,000 seeds	TORSVE030	€ 146,00
Tomato	Arabis mosaic virus (ArMV)	3,000 seeds	ARMVE030	€ 146,00
	Tobacco ringspot virus (TRSV)	3,000 seeds	TRSVE030	€ 146,00
	Tobacco streak virus (TSV)	3,000 seeds	TSVE030	€ 146,00
	Tomato ringspot virus (ToRSV)	3,000 seeds	TORSVE030	€ 146,00

Seed Quality Analysis

The Seed Analysis Laboratory carries out various tests to assess the quality of seed of flowers, trees, vegetables and herbs. Tests for germination, purity and moisture content or for tetrazolium and weeds are carried out under ISTA accreditation. In addition, the more practice-related Usable Plants Test can be performed. This can be applied to crops such as tomato, sweet pepper, cucumber-like crops, lettuce and cabbage.

Test fees

Germination test	Sample size	Test code	Fee
ISTA certificate ¹¹	400 seeds	KK004	€ 61,50
Naktuinbouw certificate	400 seeds	KK004	€ 61,50
	300 seeds	KK003	€ 53,50
	200 seeds	KK002	€ 46,80
	100 seeds	KK001	€ 40,50

Germination on weight	Sample size	Test code	Fee
ISTA certificate ¹¹ / Naktuinbouw certificate	Betula 1 gram	KK/GEW BEP	€ 112,00

Usable Plant test

	Sample size	Test code	Fee
Naktuinbouw certificate	400 seeds	TBP004	€ 112,00
	300 seeds	TBP003	€ 105,00
	200 seeds	TBP002	€ 98,00
	100 seeds	TBP001	€ 91,00

¹¹ For ISTA certificates costs for sampling and certificates are billed separately.

Tetrazolium test (excluding tree and palm seeds)

	Sample size	Test code	Fee
ISTA certificate ¹¹	400 seeds	TET004	€ 242,00
Naktuinbouw certificate	400 seeds	TET004	€ 242,00
	200 seeds	TET002	€ 199,00
	100 seeds	TET001	€ 114,00

Tetrazolium test (tree and palm seeds)

	Sample size	Test code	Fee
ISTA certificate ¹¹	400 seeds	TETB004	€ 409,00
Naktuinbouw certificate	400 seeds	TETB004	€ 409,00
	200 seeds	TETB002	€ 362,00
	100 seeds	TETB001	€ 214,00

Vigour tests (Naktuinbouw certificate)

	Sample size	Test code	Fee
Cold test (maize)	400 seeds	VIG004	€ 61,50
	300 seeds	VIG003	€ 53,50
	200 seeds	VIG002	€ 46,80

Conductancy test beans or peas (excl. moisture determination)	200 seeds	VIG EC 002	€ 23,70
---	-----------	------------	---------

Root respiration (beetroot and corn)	400 seeds	KK004	€ 61,50
	300 seeds	VIG WU 003	€ 53,50
	200 seeds	VIG WU 002 SB	€ 46,80

Root length determination (spinach)	200 seeds	VIG W/H RATIO 002	€ 60,00
-------------------------------------	-----------	-------------------	---------

Accelerated Aging Test			upon request
------------------------	--	--	--------------

Thousand seed weight (These tests are done on clean seeds)	Sample size	Test code	Fee
ISTA certificate ¹¹	800 seeds	DKG 008	€ 27,10
Naktuinbouw certificate	800 seeds	DKG 008	€ 27,10
	400 seeds	DKG 004	€ 19,20
	300 seeds	DKG 003	€ 16,50
	200 seeds	DKG 002	€ 13,70

¹¹ For ISTA certificates costs for sampling and certificates are billed separately.

Moisture determination

	Sample size	Test code	Fee
ISTA certificate ¹¹	50 or 100 gram	VOC	€ 24,40
Naktuinbouw certificate	25 gram	VOC	€ 24,40

Purity

Purity test (ISTA-certificate ¹¹ / Naktuinbouw-certificate)	Sample size	Test code	Fee
Pulses	2,500 seeds	ZB	€ 34,30
Other	2,500 seeds	ZB	€ 48,50
Purity test and determination of other seeds export Australia (combination test)	25,000 seeds	OB ZB AUSTRALIË	€ 210,00
Determining the presence of other seeds	25,000 seeds	OB 250 OROB	€ 176,00
Seed determination			upon request
Determining the presence of broken, discoloured etc. seeds ('piksel')		PB	€ 28,20

Various (Naktuinbouw certificate)

	Sample size	Test code	Fee
Determining the kind of starch for pea	5 seeds	ZB	€ 27,70
Determining dry matter of onion/carrot	10 bulbs/roots	DSB	€ 27,10
Determining 'single seeds rate' of beet seeds	400 seeds	MON	€ 50,50
Determining ploidy level	20 seeds	PLO	€ 41,60
Fractioning test	25,000 seeds		upon request
Determining the presence of Rhizomanie	500 gram seeds	RHI	€ 27,70
Determining the presence of Sclerotinia	25,000 seeds	SCL250	€ 53,50
Determining the presence of beetles in seed lots		KEV	€ 28,20

Extra charges

	Fee
Disinfection of seeds before testing	€ 19,40
Surcharge priority treatment	€ 146,00
Creation of an ISTA certificate	€ 10,60
Alteration on an ISTA certificate	€ 33,00
Alteration on a Naktuinbouw certificate	€ 4,40

Other

Fee per hour for extra research (if needed)	€ 130,00
---	----------

¹¹ For ISTA certificates costs for sampling and certificates are charged separately.

Identity testing

Naktuinbouw has laboratory techniques to determine the identity of your material. This may be important and useful where material has been mixed, mistakenly replaced, origin tracing (pathogens), when the matter is urgent and/or when morphological research is not possible.

Identity testing is carried out by using DNA fingerprint techniques. A typical research project includes sampling, DNA isolation, fingerprinting, analysis, determination of the genetic relations, statistical analysis and reporting.

It is important for identity testing that the commissioning party provides the samples as well as adequate reference samples. If samples need to be compared to a Naktuinbouw database with varieties from a third party, Naktuinbouw has to and will ask for permission from said parties before a report can be issued.

For the crops; Strawberry, Phalaenopsis, Apple, Potato and Rose Naktuinbouw features a SSR-Database. For these varieties it is possible to do an identification project per sample.

Fees for SSR identification	Per sample
For 1 - 4 Samples	€ 280,00
For 5 - 8 Samples	€ 258,00
For 9 - 16 Samples	€ 232,00

For more samples, we would gladly provide you with a quotation.

Fee for standard AFLP projects

Sample selection for AFLP projects are the responsibility of the commissioning party. If Naktuinbouw feels that the selection of reference varieties and/or the number of primer combinations are inadequate, no report will be issued until further testing. Unless the commissioning party is requesting a specific set of primer combinations for testing and analyses, it is up to Naktuinbouw to choose the primer combinations which will be tested.

For 1-16 samples with 4 primer combinations	€ 2.890
---	---------

For other amounts of samples (17-32 or 33-64) and/or other amounts of primer combinations, we would gladly provide you with a quotation.

Variety Tracer

Naktuinbouw developed a concept to help with settling the allegations of infringement of plant breeders' rights and patents: Naktuinbouw Variety Tracer®. It can provide evidence in cases of alleged infringement of plant breeders' rights, it allows to determine the identity of varieties and it can confirm suspicion of repeated cropping. Naktuinbouw Variety Tracer combines knowledge, independence and the possibility of morphological research with the possibilities of DNA fingerprint techniques. It is the combination of – and synergy between – these elements that guarantees extremely sound analyses and provides important evidence for possible court cases.

Please contact us for more information and a quotation.

Molecular identification of Cmm / Xcc isolates.

The molecular analysis of isolates of plant pathogenic bacteria will give insight in the genetic similarity. This will be done by comparing the DNA profiles from the supplied samples amongst each other and to profiles stored in the database. The results of the analysis can give insight into the relationship between the occurrences of different isolates. The analysis will be performed on a single colony culture. These can be supplied by you, accompanied with a laboratory submission form. A combination with a diagnostic test is also possible if bacteria are found in symptomatic material. A single colony culture will be made on which the molecular analysis and comparison will be performed. The results will be provided in a report including a dendrogram.

Standard fee per isolate: € 307,00

Up to a minimum of 32 samples will be collected before the analysis will be started. If there are less than 32 samples the analysis will start within 3 months. Completion of the analysis and report may take up to 3 weeks.

Urgency fee: € 1.990,30 (excluding the fee per isolate of € 301,00)

The analysis will commence directly upon receiving the samples. Completion of the analysis and report may take up to 3 weeks.

For other organisms we would gladly provide you with a quotation.

Other services

DNA Isolation

1 plate, CTAB extraction (1 - 94 samples)	€ 323,00
2 plates, CTAB extraction (95 - 188 samples)	€ 485,00

AFLP, Tiff files

It's possible to receive a Tiff file of a primer combination without analysis.

1 gel project with 1 primer combination	€ 1.020,00
1 gel project with 2 primer combinations	€ 1.290,00

*Fees are based on 1-64 samples and without DNA isolation

Arboriculture Crops and Fruits

Bio assays and making crops free from viruses

Arboricultural crops (including apples, pears, small fruit, strawberries and roses) are made free from viruses by means of various treatments, including heat treatment, at the Naktuinbouw Test Centre in Horst. The tops of treated plants are grafted onto virus-free rootstock or propagated from cuttings. Subsequent laboratory analyses, liquid inoculations using test plants and grafting onto woody indicators is applied to confirm the virus-free status of the grafted tops.

Composition of the test fee

Naktuinbouw charges a base fee for handling costs in addition to the test rate as indicated below. The basic fee for every assignment is € 51,70.

Testing fees

Tests:

	Sample size	Fee
Virus test on two herbaceous host, both in duplicate	min. 2 g. leafs	€ 210,00
<i>Each following test plant, per single plant</i>	min. 2 g. leafs	€ 46,40
Virus test on two herbaceous host Saponaria, both in duplicate	min. 2 g. leafs	€ 146,00
Virus test on Prunus serrulata 'Shirofugen'		€ 221,00
Virus test on <i>Rubus occidentalis</i>		€ 221,00
Combination Apple viruses PCR test (ApMV – ACLSV - ASGV - ASPV) ¹²		€ 94,50
Virus test on woody indicator plants (in the greenhouse per indicator, per specimen)		€ 349,00
Virus test on woody indicator plants (in the field per indicator, per specimen)		€ 153,00
Virus test of strawberry by leaf grafting on <i>Fragaria vesca</i> UC5, UC12, EMC, Alpinum		€ 109,00
Combination of strawberry viruses PCR test (SCV – SVBV – SMoV – SMYEV)		€ 94,50

Rendering free of viruses; woody plants Making woody plants virus-free:

(Including testing program, heat treatment if necessary, excluding identity determination)

	Sample size	Fee
Strawberry (per variety)		€ 3.930,00
Soft fruits (<i>Ribes</i> , <i>Rubus</i> , a.o.) (per variety per year, maximum 2 years)		€ 3.280,00

Malus, Pyrus (per variety per year, maximum 5 years)

	Sample size	Fee
year 1 (pre-testing, heat treatment)		€ 2.830,00
year 2 (testing treated material)		€ 5.020,00
year 3 up to year 5 (maintaining treated material; fee per year)		€ 680,00

<i>Prunus</i> (per variety per year, maximum 4 years)		Sample size	Fee
year 1 (pre-testing, heat treatment)			€ 2.410,00
year 2 (testing treated material)			€ 4.120,00
year 3 and year 4 (maintaining treated material; fee per year)			€ 680,00

		Sample size	Fee
Other woody plants			upon request
Extra heat treatment			€ 950,00

Per order of woody plants and strawberry, 3 fully tested plants will be delivered.

Maintenance pre basic and pre nuclear stock		Sample size	Fee
Woody plants pre basic (fruit crops and soft fruit crops)			€ 170,00
Woody plants pre nuclear stock (fruit crops and soft fruit crops)			€ 74,50
Maintaining treated material pre basic strawberry	Per parent line		€ 339,00

Consignment		Sample size	Fee
Consignment pre basic strawberry ¹³			€ 29,10

<i>Small fruit</i>		Sample size	Fee
Consignment pre basic Cutting ¹³			€ 11,50
Consignment pre basic Plug plants ¹³			€ 7,90
Consignment pre basic Root blocks ¹³			€ 127,00

<i>Large fruit</i>		Sample size	Fee
Delivery graft inoculation wood	Per hour		€ 82,50

Special services		Sample size	Fee
Preparing material for the request for Plant Breeders' Rights			upon request
Health certificate import for (EU) 2019/829			upon request
DNA fingerprinting strawberry or raspberry variety			upon request

¹³ Fees are excluding delivery costs
